ACTIVE NETWORKS COMPANY VISION

“Continue to grow as a recognizable name in hospitality for providing the most reliable and accountable IT solutions for guests and properties nationwide.”

WHO IS ACTIVE NETWORKS?

We believe in reliability and personal accountability. Ask our hotel clients. The properties that have selected Active Networks for their technology investments have benefited from the flexibility, proficiency, and commitment that our company strives to provide everyday.

Active Networks understands that most hotels and property managers need assistance to keep up with the trends in the market, but should invest in technology services that are seamless and directly influence their bottom-line.

Our success is driven by our proven experience and references working with major hotel brands, independent hotels, and hotel management groups. Active Networks’ specialists pride themselves on delivering reliable technology and for providing great hotel customer and guest services.

Select from our Information Technology (IT) services to optimize your communications, networking environments, and guest services for cost-effective performance.

INFORMATION TECHNOLOGY CONSULTING

Technology continues to evolve, and the connectivity demands of guests anytime, anywhere drive most technology investments. Whether you need assistance for a new property or converting an existing property, Active Networks provides the most dependable technology solutions to support properties and their guests with their connectivity needs. Our management team, engineers and customer service representatives are experienced in hospitality technology and provide the best business solutions and customer care for each property.

TURN-KEY WIRED/WIRELESS CONNECTIVITY SOLUTIONS

"Once we switched to Active Networks wireless technology, our guest scores immediately improved," recently stated a major hotel management group customer.

Anywhere, anytime High-Speed Internet connectivity. Hotel customers demand connectivity 24 hours a day, 7 days a week. Hotels need reliable wireless and Internet connectivity period. Active Networks provides scaleable and affordable turn-key network delivery solutions for your rooms, meeting areas, restaurants, pool areas, lobbies; anywhere your guests want to connect.

By offering reliable Internet connectivity to your guests, you provide them with the convenience and freedom of staying connected and promote future loyalty. Active Networks provides cost effective technology while delivering solutions for current and future trends in hotel guest technology needs.

24/7 HOTEL/GUEST SUPPORT

Whether your guests or hotel management needs 24/7 remote monitoring or technology troubleshooting support, we make certain your investment pays off completely and effortlessly. Our support engineers offer quality 24/7/365 support with quick resolution times by assisting the guests or the property manager in diagnosing system issues that may require timely repairs or solutions.

DIRECTV SERVICES

As an authorized dealer of DIRECTV, Active Networks can give your guests an unparalleled entertainment experience with DIRECTV's HD programming, sports, and channel variety. Hotels can create a home-away-from-home experience with DIRECTV services in every room, restaurant or lobby.

PROPERTY SECURITY SYSTEMS (CCTV)

Active Networks provides a full suite of video surveillance and integrated security solutions that enable intelligent video surveillance for your property. Security solutions can be configured to either a smaller property needing a simple camera or a major establishment requiring a complete video security solution. Our team customizes each solution with a variety of cameras, high-resolution displays, power products and accessories complete with the DVR recording and command platform. This provides safety and security for employees, guests and your property. Active Networks provides around the clock technical support, a comprehensive warranty, and has several proven security solutions for your property.

PHONE SYSTEM INSTALLATION (PBX)

Active Networks takes the complexity out of hotel communications with a feature-rich communication solution that eases the burden on reception staff without compromising customer service. Our PBX solution lowers communication costs, simplifies the guest experience, and makes deployment and maintenance easier. With a unified communications solution it is possible to converge data and voice while improving call handling and customer service.

Active Networks provides cost effective and flexible business pricing solutions for your property. Whether you require single or multiple technology solutions, by partnering with Active Networks, you get reliable and scaleable technology that directly improve your guests experience and promise a guaranteed return.
